

GR. 12 ADVISORY

‘TO DO LIST: OCTOBER 19’

A goal should
scare you a little,
& excite you A LOT.

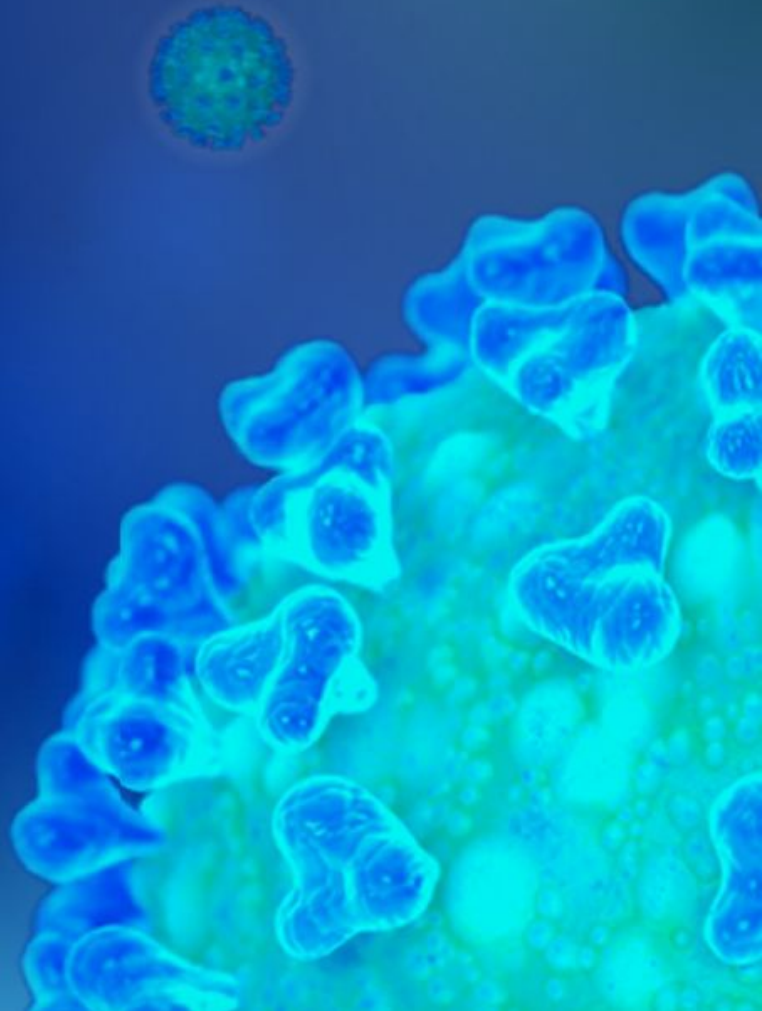

Joe Vitale

PLEASE HELP CONTINUE TO KEEP SCHS SAFE FOR ALL

“Every Albertan has a role to play in keeping their friends, family, and neighbours safe. Diligently following the health measures in place means you are being considerate and caring, not over cautious or afraid. Let’s all see it as our **personal responsibility** to follow the health measures and keep people safe.”

- Dr. Deena Hinshaw, Chief Medical Officer of Health,
Alberta Health Services

How COVID-19 Spreads

PEOPLE

This disease can spread from person to person through small droplets from the nose or the mouth when the infected person coughs or exhales

SURFACES

These small droplets land on surfaces, which means any person that touches these surfaces and then their eyes, nose or mouth can become infected

The best way to prevent the spread

Wash your hands often for
at least 20 seconds

Avoid touching your eyes, nose
or mouth, especially with
unwashed hands

Cough and sneeze into
your sleeve and not
hands

Practice physical distancing
at all times
(at least 2 meters)

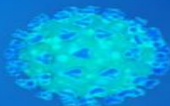

Stay home if you are
sick

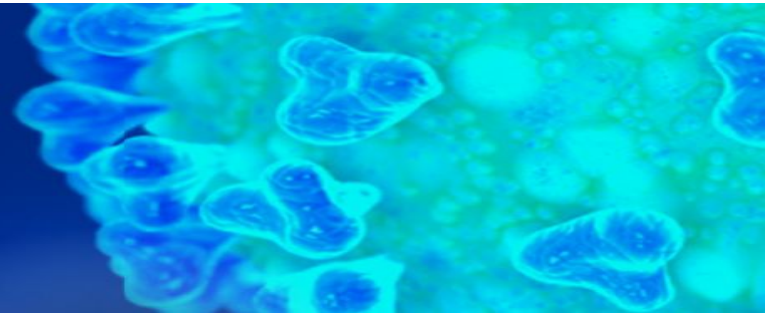

Wear a non-medical or face
covering to cover the
nose and mouth

Please continue to wear masks when unable to socially distance and when finished eating/drinking.

THANK YOU

HALLOWEEN SPIRIT WEEK

MONDAY OCT. 26 – FRIDAY OCT. 30

- Monday – Meme Day
- Tuesday- Tourist Day
- Wednesday – Jersey Day
- Thursday- Ghost Day (wear white)
- Friday – Halloween Costume and Photo Day

AND NOVEMBER

“TOP TEN JOBS COLLEGE MAJORS THAT LEAD TO GOOD CAREERS”

- This is based on American Statistics
- This video is just for discussion purposes! The “list” type videos are dependent on how and where the research was conducted.
- <https://www.youtube.com/watch?v=LR AZrrFwSpE>

COMMENTS FOR DISCUSSION ON VIDEO

- “And biochemistry, biotechnology, molecular biology, etc. should really be on this list. These are the fastest growing scientific fields. They are the fields doing research to make new medicines and gene-based therapies. Pharmaceutical sciences will always be a HUGE money maker. And by the way, a PharmD (pharmacist) easily makes six figures straight out of school. Not sure why that wasn't here. This video is not comprehensive at all. (PS physics isn't that lucrative, that was my first major.) Their info is crap, and no sources are listed at all.”
- “What this video doesn't tell you is that after you get a bachelor's degree, your first job is most likely grueling and demanding for a few years. After you work your way up in the industry, it becomes much more worth it.”
- “Any college major can lead to a successful career if you put forth the effort. It all depends on how you define success anyway.”

TOP 10 HIGH DEMAND JOBS IN CANADA DURING PANDEMIC
